

Dave Hart has been providing high quality landscaping services to the Durango area for over twenty-five years, after graduating from Utah State University with a degree in Landscape Architecture and Environmental Planning. We are convinced that a landscape designed around the principles of sustainability will result in a functional, efficient and attractive area for your family to enjoy for years to come. We are proficient in all areas of landscape construction and Gardenhart Landscape & Design purchases all of its materials locally and pays a living wage to its employees. We look forward to working with you.
